

LaTeX Example

Nicolás Brailovsky

June 20, 2009

This is just a LaTeX kick off, with some basic commands.

1 Section one

For example, this is a paragraph.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Donec porta, enim eget tempus tempor, eros sem dapibus diam, vitae lacinia mauris metus id nulla.

1.1 Subsection

You can have subsections too ...

1.2 Subsection'

... as many as you want

1.3 Random stuff

You can even create a shopping list in LaTeX, if you wish

- Beer
- Beer
 - (Another brand of beer)
- Pizza
- Beer

Or even better, use it to do the homework.

Math is a breeze in LaTeX: $x_n = \sqrt{a + b}$ can be typeset inline.
